## Homepage

**Showing featured properties, a search box and all types available for browsing.**

1. A Browse module that displays all the property types.
2. Hottest properties with pictures shows the most popular properties based on clicks. This module only counts properties which has at least one photo.
3. Displays latest properties added to the site.
4. List Agents and List Companies displays a drop-down box which allows visitor to jump to a particular agent or company.
5. Randomly displays properties.
6. Featured section displays the top 3 featured properties from the site.
7. Allows visitors to search for properties or go to Advanced Search page.
8. Property Types presents a fast and friendly directory for visitors to look for properties.
9. Similar to #2 but shows featured properties with at least one photo.

## Property page

This is the details page for a property showing all available information in a single page.

1. 3 icons that allows visitor to save this page as PDF files, print it in a printer-friendly format or send this page to a friend.
2. The main photo with title and description.
3. Additional photos in thumbnail. When clicked, a large version of it will replace the main photo.
4. This is where all the information about the property will appear. You may define as many custom fields as you like and it only appears if you enter a value to it.
5. Agent's contact information and a brief description about him/her.
6. Built in e-mail form to enable visitor to contact agent within the same page.
7. The actual PDF screenshot from #1.

## Edit Property

**Edit Property page allows administrator or agent to manage a property's details, including photos and availabilities.**

1. The main *Property* tab shows the main form for entering core data (Address, Agent, Type, Name etc.).
2. *Extra Fields* has a similar form as *Property* tab, but it is used for entering custom fields' data.
3. *Photos* tab allows you to upload and manage photos for this property.
